FACTS

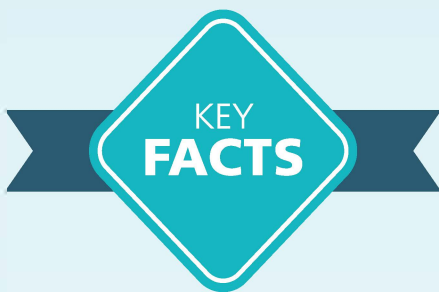

The Local Care Record in Southwark and Lambeth

sharing electronic patient records safely and quickly

connecting local hospitals and GPs

improving care and experience for patients

Your GP and hospital already share information with each other

Your local hospitals and GP practice already share information with each other to help provide you with the right care and treatment. Currently, this is shared via traditional methods such as secure post, fax or email, which can be slow and, at times, unreliable. The Local Care Record will speed this process up for you to allow healthcare professionals to provide you with quicker, safer and better care.

Sharing your information will help to improve the care you receive

To provide the best treatment and support healthcare professionals need access to the most up-to-date information about you. This information can be from a range of services including hospitals and your GP practice and might include things like your test results and the medicines you are taking. Therefore, sharing information between these services will allow the people that are supporting you to make better decisions and work with you more effectively.

Your information is secure

Your information can only be accessed over a secure healthcare network and by staff that are directly supporting your care and treatment. By law, people working in or on behalf of the NHS or as part of NHS healthcare teams must respect your privacy and keep all information about you safe.

Not everyone can see your record

Only staff directly involved in your care will be permitted to view your record.

Your records will not get sold to insurance or research companies

Your personal information will never be shared with or sold to insurance or research companies.

The Government will not use the Local Care Record to make decisions about you

Your information is only ever used for direct patient care and is only available to local hospitals, your GP Practice and professionals working within those organisations, through the Local Care Record.

Your personal information is not shared with any other government organisation.

Your records will not sit on a national database somewhere

The Local Care Record is not a database; it is a view only portal.

Your information remains in the place where it is originally created (such as your GP or hospital) and will only ever be viewed through a secure online portal when it will help improve your care.

You do have a choice about this

Allowing your information to be shared between your local NHS providers will bring benefits to the care we are able to provide you, but if you wish for your information not to be shared then please speak to your GP, healthcare professional, call **020 7188 8801** or email **gst-tr.GSTPALS@nhs.net**
